

回转锁风喂料机 Air Lock Rotary Feeder

立式磨专用锁风喂料机(引进德国技术), 也可作为风扫式球磨机的锁风进料设备。

It is a specially designed feeder for roller mills (acquired German technology).
It can be also used with air-swept ball mills.

注: 叶轮中通热风, 加热叶轮, 以适应高水份粘性物料, 防止粘结。
Re: Impellers can be heated by hot air, in order to be suitable for high-humidity viscous materials and prevent adhesion.
